SOURCE (OR PART OF THE FOLLOWING SOURCE):

Type	Dissertation
Title	Energy dependent polymerization of resin-based composites
Author	R.H. Halvorson
Faculty	Faculty of Dentistry
Year	2003
Pages	101

Table of Contents

Chapter 1 Introduction 1

Determining extent of cure: conversion 2

Factors affecting extent of conversion 4

Extent of cure: clinical relevance 10

Aim and outline of investigation 13

References 15

Chapter 2 Effect of filler and silane content on the conversion of resin-based composite

Introduction 21

Materials and Methods 23

Results 26

Discussion 29

Conclusion 31

References 33

Chapter 3 Energy dependent polymerization of resin-based composite

Introduction 37

Materials and Methods 38

Results 41

Discussion 46

Conclusion 49

References 50

Chapter 4 An energy conversion relationship predictive of conversion profiles and depth of cure for resin-based composite

Introduction 53

Materials and Methods 55

Results 57

Discussion 62

Conclusion 66

References 67

Chapter 5 Polymerization efficiency of tungsten-halogen and LED lamps: A universal energy conversion relationship predictive of conversion of resin-based composite

Introduction 69

Materials and Methods 71

Results 74

Discussion 77

Conclusion 78

References 80

Chapter 6 Summary and Conclusions 81

Chapter 6 Samenvatting en Conclusies 87

Appendix 1 95

Appendix 2 99

Acknowledgments 101
