Functional implications of endothelial cell genomics

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
Prof. dr. D.C. van den Boom
ten overstaan van een door het
college van promoties ingestelde commissie,
in het openbaar te verdedigen in de Agnietenkapel
op vrijdag 4 juli 2008, te 12.00 uur
door

Rudolf Dirk Fontijn

geboren te Alkmaar

Promotiecommissie

Promotores:	Prof. dr. A.J.G. Horrevoets
	Prof. dr. H. Pannekoek
Oveige leden:	Prof. dr. J.M.F.G. Aerts
	Prof. dr. E.Th. van Bavel
	Prof. dr. V.W.M. van Hinsbergh
	Dr. J.A. van Mourik
	Dr. J.J. Voorberg

Faculteit der Geneeskunde

The research described in this thesis was conducted at the Department of Medical Biochemistry in the Academic Medical Center of the University of Amsterdam.

The study described in this thesis was supported by a grant of the Netherlands Heart Foundation (NHF-M93.007). Financial support by the Netherlands Heart Foundation for the publication of this thesis is gratefully acknowledged.

"Every solution of a problem raises new unsolved problems; the more so the deeper the original problem and the bolder its solution. The more we learn about the world, and the deeper our learning, the more conscious, specific, and articulate will be our knowledge of what we do not know, our knowledge of our ignorance. For this, indeed, is the main source of our ignorance -- the fact that our knowledge can be only finite, while our ignorance must necessarily be infinite."

Karl Popper, *Conjectures and Refutations*.
