SOURCE (OR PART OF THE FOLLOWING SOURCE):

Type	Dissertation
Title	Triacylglycerol structures and the chocolate fat bloom mechanism
Author	J.B. van Mechelen
Faculty	Faculty of Science
Year	2008
Pages	iii, 136

Contents

Chapter 1 Introduction **1**

1.1 Fats 1
1.2 Crystals and diffraction principles 4
1.3 X-ray diffraction of TAGs 8
1.4 Structure determination using powder data 11
1.4.1 Sample preparation and data collection 11
1.4.2 Indexing and space group determination 13
1.4.3 Structure determination using direct space global optimization. 14
1.4.4 Structure refinement 15
1.5 Bibliography 18
1.6 References 18

Chapter 2 Structures of mono-unsaturated triacylglycerols Part I. The β_1 polymorph **21**

2.1 Abstract 22
2.2 Introduction 22
2.3 Experimental methods 24
2.3.1 Samples, sample preparation and data collection 24
2.3.2 Indexing 25
2.3.3 Model building and analysis 28
2.4 Results and discussion 29
2.4.1 Data collection 29
2.4.2 Indexing, structure determination and refinement of the β_1 polymorphs 31
2.4.3 Influence of data resolution 34
2.4.4 The β_1 polymorph crystal-structure models 35
2.4.5 The relation between melting point and Methyl end-plane packing 39
2.5 Conclusions 40
2.6 Acknowledgements 41
2.7 References 41
2.8 Appendix Rietveld refinement results of β_1 structures 44

Chapter 3 Structures of mono-unsaturated triacylglycerols Part II The β_2 polymorph **49**
3.1 Abstract 50
3.2 Introduction 50
3.3 Experimental methods 51
3.3.1 Samples, sample preparation and data collection 51
3.3.2 Indexing, model building, structure determination and refinement 52
3.4 Results and discussion 54
3.4.1 Data collection 54
3.4.2 Anisotropic cell-parameter contraction 56
3.4.3 The novel β_2-POS and β_2-SOA polymorphs 57
3.4.4 Indexing, structure determination and refinement of the β_2 polymorphs 58
3.5 The novel β_2 polymorph crystal structure model 59
3.5.1 Conformation of TAGs 59
3.5.2 Built-up and stacking of 'three packs' 60
3.5.3 Subcell 60
3.5.4 Fingerprint area interpretation 61
3.5.5 Methyl end-plane packing and melting points 62
3.5.6 The β_2 to β_1 phase transition 63
3.6 Conclusions 65
3.7 Acknowledgements 66
3.8 References 66
3.9 Appendix Rietveld refinement results of β_2 structures 68

Chapter 4 Structures of mono-unsaturated triacylglycerols Part III The β-2 polymorphs of *trans*-mono-unsaturated triacylglycerols, and related fully saturated triacylglycerols **71**
4.1 Abstract 72
4.2 Introduction 72
4.3 Experimental 73
4.3.1 Samples, sample preparation and data collection 73
4.3.2 Indexing, model building, structure determination and refinement 74
4.4 Results and discussion 78
4.4.1 Packing of the β-2 TAGs 78
4.4.2 The methyl end-plane 82
4.4.3 The packing of LMM and PSS 86
4.4.4 The problem of local minima 87
4.5 Conclusions 89

4.6 Acknowledgements 90
4.7 References 90
4.8 Appendix Rietveld refinement results of β-2 structures 92

Chapter 5 Structures of mono-unsaturated triacylglycerols Part IV The highest melting β'-2 polymorphs of *trans*-mono-unsaturated triacylglycerols and related TAGs and their polymorphic stability 99
5.1 Abstract 100
5.2 Introduction 100
5.3 Experimental 102
5.3.1 Samples, sample preparation and data collection 102
5.3.2 Indexing, model building, structure determination and refinement 103
5.4 Results and discussion 107
5.4.1 The structure determination process 107
5.4.1.1 β'_1-2 PEP, β'_1-2 PSP, β'_1-2 PPE and β'_1-2 PPS 107
5.4.1.2 β'_0-2 PSS 108
5.4.2 The role of temperature in the interpretation of XRPD patterns 109
5.4.3 Phase transitions and stability of polymorphs 111
5.4.3.1 The $\alpha \rightarrow \beta'_2$ Phase transition 111
5.4.3.2 The $\beta'_2 \rightarrow \beta'_1$ phase transition 112
5.4.3.3 Stability of β'_1-2 112
5.4.3.4 β'_0-2 PSS 114
5.4.4 Packing and methyl end-plane 115
5.4.4.1 β'_1-2 PEP, β'_1-2 PSP, β'_1-2 PPE and β'_1-2 PPS 115
5.4.4.2 β'_0-2 PSS 118
5.4.5 Comparison of β' structures 119
5.4.6 Comparison of β' and the β structures 121
5.5 Conclusions 121
5.6 Acknowledgements 123
5.7 References 123
5.8 Appendix Rietveld refinement results of β'-2 structures 125
