1 introduction

Enclosed are two lists, each containing about 1100 potters' stamps on Samian ware from Valkenburg Z.H. The lists are sorted by potter and by find number respectively. The lists are not comprehensive. Presumably many more stamps have not yet been discovered in the enormous mass of find material from the Valkenburg fortresses.
Firstly, the data are based on the stamps published by W. Glasbergen[1], and secondly on comments by the late B.R. Hartley, University of Leeds, who has studied the major part of the potters' stamps from Valkenburg on behalf of "The Leeds Index of Potters' Stamps on Samian Ware", a 10-volume corpus, now being edited by the Department of Classics of the University of Leeds. Finally there are data from the right *retentura* at Valkenburg, which have recently been described and catalogued for the first time.
We regret that it is not possible to provide images of the finds, because at the moment the Valkenburg finds are inaccessible. Therefore, we only refer to the drawings in the publications by Glasbergen and to the Leeds Index in preparation, where many rubbings of the imprints of the individual stamps, including a large amount from Valkenburg, are incorporated. Finally, Polak quotes many finds from Valkenburg. We refer to his work as much as possible, especially in connection with the still unpublished finds from the right *retentura* in Valkenburg.
All finds from Valkenburg Z.H., including the potters' stamps, belong to the collections of the Rijksmuseum van Oudheden, Leiden.

To download a .pdf-version of this report: www.aacprojectenbureau.nl ('publicaties')

N.B. The datings in the column "Period" are:

a. Valkenburg periods:

per. 1 : 40-42

per. 1a : 42-47

per. 2/3 : 47-69

per. 4 : c. 71-c. 120

per. 5 : c. 120- before 178 ?

per. 6 : c. 178 ? – ca. 260

From recent research it may be deduced that the distribution of the finds points to a longer duration of period 1, perhaps until A.D. 45 and, as a consequence, a shorter duration of period 1a (ca. 45-47).

b. Dating in arabic figures, quoted from Polak 2000.

c. Dating after the Roman emperors, quoted from Oswald 1931.

d. Incidentally, the publication of the Valkenburg glass (Van Lith 1978/1979) has been referred to, because it has allocated periods.

[1] 1948 (excavation campaign 1941), 1955 (campaign 1942) and 1972 (excavation canpaign 1962).

3 Terra Sigillata stamps from Valkenburg sorted by potter

Explanation of special characters:

BASS(VS) = VS partly broken
BAS[SVS] = supplements in the case of physical damage. SVS is most probable reading.
[. . . . .] = text between brackets missing. Room for 5 characters.
]SSVS = beginning missing
<BA>SSVS = conjectural additions
BA[= end missing
BASSV-S = V and S ligated
*B*ASSVS = B and A stamped retro
**BASSVS = BASSVS stamped retro
• /+ = decoration
- = no decoration

4 Terra Sigillata stamps from Valkenburg sorted by find number

Explanation of special characters:
BASS(VS) = VS partly broken
BAS[SVS] = supplements in the case of physical damage. SVS is most probable reading.
[. . . . .] = text between brackets missing. Room for 5 characters.
]SSVS = beginning missing
<BA>SSVS = conjectural additions
BA[= end missing
BASSV-S = V and S ligated
*B*ASSVS = B and A stamped retro
**BASSVS = BASSVS stamped retro
• /+ = decoration
- = no decoration
