SOURCE (OR PART OF THE FOLLOWING SOURCE):

Type	Dissertation
Title	A model-based analysis of the development of learning
Author	V.D. Schmittmann
Faculty	Faculty of Social and Behavioural Sciences
Year	2009
Pages	200

CONTENTS

1 General Introduction 1
1.1 Overview of Chapters 11

2 Markov Process Models for Discrimination Learning 13
2.1 Introduction 13
2.2 The Markov model: state space and transition dynamics 14
2.3 The Markov model: parameters, likelihood and estimation 18
2.3.1 Parameters 19
2.3.2 Likelihood 20
2.3.3 Mixtures of Markov models 21
2.3.4 Likelihood & parameter estimation 23
2.4 Discrimination learning and concept identification 25
2.4.1 Experiment 25
2.5 Mixture models 26
2.5.1 All-or-none models 28
2.5.2 Concept identification models 29
2.5.3 Mixture models 31
2.5.4 A posteriori distributions 34
2.6 Models: interpreting the mixture components 37
2.6.1 Assigning subjects to components 38
2.6.2 Covariates 39
2.6.3 Combining categorical and continuous data 39
2.7 Summary and discussion 40

3 Multiple Learning Modes in the Development of Performance on a Rule-Based Category-Learning Task 43
3.1 Introduction 43
3.2 Method 48
3.2.1 Participants 48
3.2.2 Task and procedure 48
3.2.3 Statistical approach 49
3.2.4 Learning models 49
3.2.5 Relations between models 54

3.2.6 Mixtures of learning models 55
3.2.7 Type I development: Change in efficiency of a single mode of learning 55
3.2.8 Type II development: Change in tendency of learning in distinct learning modes 55
3.2.9 Summary of models 56
3.2.10 Model comparison and selection 56
3.3 Results 56
3.3.1 Single-group learning models 57
3.3.2 Models of development 59
3.3.3 Discussion of model CI-AN8g″ 60
3.4 Discussion 62
3.4.1 Summary 62
3.4.2 Interpretation of the learning processes 65
3.4.3 Conclusion and extensions 70

4 Development of Reversal Shift Learning: An Individual Differences Analysis 73
4.1 Introduction 73
4.2 Method 76
4.2.1 Participants 76
4.2.2 Task and procedure 77
4.3 Learning models 77
4.3.1 Initial learning 78
4.3.2 Shift learning 80
4.3.3 Relation between initial and shift learning 80
4.4 Results 81
4.4.1 Initial learning 81
4.4.2 Shift learning 81
4.4.3 Initial and shift learning 82
4.5 Discussion 84

5 Working Memory and Attentional Control Related to Strategies in Discrimination Learning 87
5.1 Introduction 87
5.2 Method 90
5.2.1 Sample 90

5.2.2 Experimental tasks 91
5.3 Results 93
5.3.1 Learning task 93
5.3.2 Working memory task 99
5.3.3 Attentional control task 99
5.3.4 Sequential regression analysis 101
5.4 Discussion 101
5.5 Appendix: Model results and selection 108

6 Discrete Latent Markov Models for Normally Distributed Response Data 113
6.1 Introduction 113
6.2 Area of application 116
6.3 Mixed Markov latent state models for multinormal data 118
6.3.1 Markov models 118
6.3.2 Multinormal mixture models 122
6.3.3 Within-component models 124
6.4 Estimation 128
6.5 Model comparison 128
6.6 Illustrations 129
6.6.1 Illustration 1 129
6.6.2 Illustration 2 134
6.7 Discussion 139

7 Parameter Identification in Multinomial Processing Tree Models 141
7.1 Introduction 141
7.2 MPT models 143
7.3 Identification 144
7.4 Examples 147
7.5 Other parameterizations 154
7.6 Discussion 154
7.7 Appendix: Maxima input code for three-source 2HTSM 157

8 Discussion and Conclusion 159
8.1 Summary and discussion 159
8.2 Directions for future research 164
8.3 Conclusion 166

Summary in Dutch (Samenvatting) 169
