Contents

Acknowledgments **vii**

1 General Introduction and Overview **1**

1.1 Endogenous regressors 1

1.2 Some practical research questions 4

1.3 Overview of this thesis 5

2 The asymptotic and finite sample (un)conditional distributions of OLS and simple IV in simultaneous equations **9**

2.1 Introduction 9

2.2 Model, estimators and standard asymptotics 13

2.3 The asymptotic distribution of inconsistent OLS 15

2.4 Measures for estimator accuracy 21

2.5 Pictured parametrizations 25

2.5.1 A basic static IID model 26

2.5.2 Actual findings 30

2.6 Conclusions 34

3 On the limiting and empirical distribution of IV estimators when some of the instruments are invalid **41**

3.1 Introduction 41

3.2 Model, assumptions and theorems 46

3.3 Illustrations 55

3.3.1 A simple just identified model 57

3.3.2 A simple overidentified model 66
3.4 Conclusions 71
3.5 Appendix 73

4 Evaluating the performance of tests of overidentifying restrictions 97
4.1 Introduction 97
4.2 Test statistics for overidentifying restrictions 99
4.2.1 GMM statistics 99
4.2.2 GEL statistics 104
4.3 Bootstrap procedures 105
4.3.1 HH type bootstrap 106
4.3.2 EL type bootstrap 110
4.3.3 Residual type bootstrap 111
4.4 Illustrations 113
4.4.1 Homoscedastic Example 113
4.4.2 Heteroscedastic Example 114
4.5 Conclusions 122

5 Sequential test procedures for instrumental variable selection 133
5.1 Introduction 133
5.2 Notation, assumptions and the test statistic 136
5.3 Selection of valid instruments 140
5.3.1 Procedure A 141
5.3.2 Procedure B 142
5.3.3 Procedure C 142
5.4 A Monte Carlo Study 145
5.5 An Empirical Example 154
5.6 Alternative inference and a sensitivity analysis 166
5.7 Conclusions 172
5.8 Appendix 176

Summary in English **179**

Samenvatting in het Nederlands **181**

Bibliography **189**
