| Title | Spatial correlations and deformation modes in sheared colloidal glasses |
| Author | V.K. Chikkadi |
| Faculty | Faculty of Science |
| Year | 2011 |
| Pages | vi, 128 |
| ISBN | 9789491211768 |

# Contents

**1 Glasses : Introduction** **1**

1.1 Introduction . . . . . 1

1.2 Phenomenology of the glass transition . . . . . 3

1.2.1 Glass transition in colloids and grains . . . . . 6

1.3 Jamming phase diagram . . . . . 8

1.4 Heterogeneous dynamics in quiescent glasses . . . . . 9

1.5 Heterogeneous dynamics in sheared glasses . . . . . 11

1.6 Density of states of glasses . . . . . 13

1.7 Present thesis . . . . . 15

**2 Experimental techniques** **17**

2.1 Colloids . . . . . 17

2.2 Hard Sphere Colloids . . . . . 18

2.2.1 Phase behavior of hard-sphere colloids . . . . . 19

2.2.2 Stabilization of hard-sphere colloids . . . . . 21

2.3 Sample Preparation . . . . . 22

2.4 Shear cell set-up . . . . . 22

2.5 Confocal Microscopy . . . . . 24

2.5.1 Optical Microscope . . . . . 24

2.5.2 Laser Scanning Microscope . . . . . 25

2.5.3 Resolution . . . . . 26

2.5.4 Data acquisition . . . . . 27

2.6 Particle dynamics . . . . . 28

2.6.1 Particle motion in a quiescent colloidal glass . . . . 30
2.6.2 Analysis of particle motion in sheared colloidal glasses 31

**3 Deformation modes of colloidal glasses 35**
3.1 Introduction . . . . . 35
3.2 Deformation of glasses . . . . . 35
3.2.1 Theoretical models of deformation . . . . . 37
3.2.2 Argon's model . . . . . 39
3.2.3 Shear localization . . . . . 39
3.3 Experimental investigations of shear transformation zones . 40
3.3.1 Bubble rafts . . . . . 40
3.3.2 Colloidal glasses . . . . . 41
3.4 Flow of colloidal glasses . . . . . 42
3.4.1 Homogeneous flow . . . . . 43
3.4.2 Inhomogeneous flow . . . . . 47
3.5 Shear banding : coexistence of dynamic phases . . . . . 52
3.5.1 Dynamic order parameter . . . . . 52
3.5.2 Co-existence of dynamic phases . . . . . 55
3.6 Conclusions . . . . . 57

**4 Long-range strain correlations in sheared colloidal glasses 59**
4.1 Correlations in glasses . . . . . 60
4.1.1 Static two point correlations . . . . . 60
4.1.2 Dynamic four-point correlations . . . . . 61
4.2 Numerical and experimental investigation of dynamic correlations . . . . . 62
4.2.1 Simulation studies . . . . . 62
4.2.2 Experimental studies . . . . . 65
4.3 Probability distribution of non-affine displacement fluctuations 65
4.4 Spatial correlations of shear strain and non-affine displacement 67
4.4.1 How do shear bands emerge? . . . . . 73

4.4.2 Scaling of different definitions of non-affine displacement . . . 74
4.5 Conclusions . . . 75

**5 Anisotropic scaling of strain correlations in sheared colloidal glasses 77**
5.1 Introduction . . . 77
5.1.1 Experimental and simulation studies of anisotropy . 78
5.2 Probability distribution function of non-affine displacements 80
5.3 Spatial correlations and circular harmonics . . . 82
5.3.1 Projection onto circular harmonics . . . 83
5.3.2 Angular wedges . . . 84
5.4 Anisotropy of spatial correlations . . . 84
5.4.1 Homogeneous flow . . . 84
5.4.2 Inhomogeneous flow . . . 87
5.5 Conclusions . . . 90

**6 Structural relaxation and low frequency modes in colloidal glasses 93**
6.1 Introduction . . . 93
6.2 Normal modes . . . 94
6.2.1 Dynamical matrix . . . 95
6.3 Normal modes of colloidal glasses . . . 96
6.4 Visualization of the normal modes . . . 99
6.5 Origin of structural rearrangements . . . 100
6.5.1 Identifying the structural rearrangements . . . 100
6.5.2 Connecting the structural rearrangements and low frequency modes . . . 104
6.6 Conclusions . . . 105

**Summary 120**

**Samenvatting** 122

**List of publications** 125

**Acknowledgements** 127
