SOURCE (OR PART OF THE FOLLOWING SOURCE):

Type	Dissertation
Title	The effect of the central nervous system on infection and inflammation : “it takes nerves”
Author	I.A.J. Giebelen
Faculty	Faculty of Medicine
Year	2008
Pages	199
ISBN	9789064642005

Contents

1 Introduction and outline of this thesis 9

2 The central and autonomic nervous systems: Essential regulators of the immune response 13

PART I: Anti-inflammatory reflex

3 Vagus nerve stimulation inhibits activation of coagulation and fibrinolysis during endotoxemia in rats. 31

4 Stimulation of α7 cholinergic receptors inhibits lipopolysaccharide-induced neutrophil recruitment by a tumor necrosis factor-α independent mechanism 45

5 The cholinergic anti-inflammatory pathway regulates the host response during septic peritonitis. 59

6 Deficiency of α7 cholinergic receptors facilitates bacterial clearance in *Escherichia coli* peritonitis 81

7 The vagus nerve and nicotinic receptors modulate experimental pancreatitis severity in mice. 97

8 Local stimulation of α7 cholinergic receptors inhibits lipopolysaccharide-induced tumor necrosis factor-α release in the mouse lung 115

9 Stimulation of nicotinic acetylcholine receptors by nicotine transiently impairs host defense during pneumococcal pneumonia 127

PART II: Sympathetic nervous system

10 Endogenous β adrenergic receptors inhibit LPS-induced lung inflammation and coagulation 145

11 Role of endogenous β adrenergic receptors in the host response to pneumonia caused by *Pseudomonas aeruginosa* 161

PART III: General Discussion and Dutch Summary

12 Summary and General Discussion 177

13 Nederlandse samenvatting voor niet ingewijden 185

PART IV: Appendices

Dankwoord 194

Bibliography 198

Curriculum Vitae 199
