Acknowledgments

During the four years, which I spent at the University van Amsterdam I got a lot of support from many wonderful people. They were always when I needed them and in this place I want to thank them very, very much. Without them this thesis would have never been done.

First of all I would like to thank my supervisor, prof. A.M. Brouwer for giving me a chance to work with him and learn from him. Fred, thank for all the discussions, guidance and support; especially in the moments when I was weak. Thank you for all your time you spent reading and correcting my texts and for your forbearance.

I am particularly grateful to John van Ramesdonk. You were my best teacher and friend in one person. With your help I got a lot of experience in the laboratory. I hope I got at least a bit of your great knowledge during the period we have spent together in the lab. As my friend you were always on my side and I knew that I may always count on you. You and Thea gave me a second home in this, new for me, country. Thank you for all of that.

René, thank you for all the inspiring discussions we had and your help with preparing our manuscript. Wybren Jan, thank you for infecting me with your optimism and good energy every time I have seen you running through the corridor! Yes Hong, I know I should not eat so much chocolate... I promise to drink more Chinese thee and thank you for your humor. Sander, you gave me a feeling during my group meeting presentations that there is somebody who truly wants to understand what I was working on.

For the technical support I thank Dick Babelaar, Michiel Hilbers, Rolf Sitters and Michiel Groneveld. Thanks to you I was able to conduct many experiments and learn a lot about the sample and the setup. Work with you was a pleasure for me.

Finally I would like to mention the whole molecular photonics group I was working with; Leszek, Bert, Michiel, Steven and Tanzeela - I had a lot of great time being in the same office with you... just a great time. Steven, I appreciate very much your help with chemical aspects of my work. Alessandro, thank you for organizing all the outings and parties... maybe not the "Clover fields" after which I got really sick... but the rest I have enjoyed! Pablo... I think Alex did it because he likes you but I hope he will never have a chance to show you this feelings again ;) Chantal, I enjoyed collaboration with you a lot. Good luck with your further research.

At this place I also want to mention people I met at UvA when I came a first time to the Netherlands: Anouk, Grzegorz, Natalia, Matthijs, Peter. So nice of you that you have tried to communicate with me... I know that this was difficult... very difficult ;) Danny, I really loved your accent! I still do...

I am very grateful to the "Chinese mafia" (Yu, Kai and Xiaomin) for showing me their culture. Whatever you claim, I still think that your language is very complicated! Pavol and Oli, thanks for giving accommodation for me and Alex (Pavol I am grateful you did not eat

Alex... I know it was tempting). Alexander and Natalia, it was very nice to meet you. I like playing poker with you... love winning ;) We have to redo it.

I was lucky to meet a great group of people with whom I had a great (mostly lunch) time: Adriana, Alisa, Sergio, Matthijs and Tibert. Hope we can finally organize another movie evening with a wonderful (as before) collection of first sort movies. Matthijs with Claire, don't you think that I have forgotten about the promised grill party – I did not!

I want to thank people who were working with me on different projects: Erica, Fabrizio, Markus and Piluka. Thank you all for your help! Sander, I enjoyed working with you as much as having drinks and chatting... Hope we will continue this.

During the period I had teaching I met a lot of students and got closer to some of them. Here I wanted to mention Johanne, who was always working like crazy, “enjoying” with me quantum chemistry Anna, Patrick – great fan of thermodynamics (I am very proud that you have passed the exam... finally) and Erik, not very happy with sitting too long alone in a dark lab.

Very special thanks to Renate, Ineke and Hilde for administrative matters and organizing HRSMC events and to the personnel of UvA library and central storage for their help and kindness.

I had a wonderful time in Amsterdam thanks to my great friends. Szymon was always ready to help with everything (really everything!) since I came here. After some time Grzegorz joined me here and my life changed completely (in good sense of course!). Grzes, dziękuję, że przetrwałeś wszystkie moje odchyły od normy... I że zawsze byłeś blisko, żeby mi pomóc i podtrzymać na duchu.

Marcel, thank you for introducing me into a world of a great music. I think we had also a great time working together... but the funniest moments were always during (or just after) our fights ;) Yes, I still have problems with remembering which year we have or what are the names of people I see and talk to every day – thank you for “understanding”. Aaaa, and the last birthday gift I enjoyed a lot. Enjoy... patisony!

Big thanks to Ola (with Grzegorz) for small talks every day and exchanging a lot of information useful for expatriates. Chian, sorry that we did not have too much time to talk... I hope we will see each other soon... I want to thank Van Ahn for her patience, modesty and wisdom – I should learn more from you!

Here I want to mention many of my friends I made here and my old friends who were visiting me. I had a great fun with Tuur (cinema-mate) and Paul (picnic-mate). Hope we will see each other soon.

A lot of hugs for all my Polish friends who were visiting me and giving me lots of fun... and sleepless nights. Damian (Dymian!) i Sylwia – ja Was po prostu kocham (...platonicznie, żeby nie było)! Agnieszko (i Karolu), dzięki Wam udało mi się skończyć Politechnikę. Dziękuję Wam za wszystkie notatki i Waszą przyjaźń. Obie Anie i Wiola – już czekam na Waszą kolejną wizytę... mam nadzieję, że wtedy będę miała więcej czasu. Aaaa, no a Tomek i Krzys jak tutaj sami nie przyjadą to im nakopie w niecenzuralne miejsce i zawiozę do Amsterdamu. Michaś (z grupą Garbusową) – możesz wierzyć albo nie ale mam teraz moją ulubioną koszulke... z siekierą!

There is also many of my friends who still did not visit me (but it will change...). Thanks to them I could always count on warm reception whenever I visited my country. Great bunch of people from Politechnika Wrocławska... Przemku i Aniu, już nie mogę się doczekać kolejnego spotkania. Mareczku i Sylwio, jak się Wam układa i kiedy będziecie mogli przylecieć? Tomciu i Aniu z małżeństwem, dziękuję Wam za czas, który poświęćcie mi kiedy pojawiam się w Polsce. Sebastianku i Agnieszko – to już jest rozbój w biały dzień... wieki się nie widzieliśmy i czas to naprawić! Sabinko i Tomku, wiekie dzięki za miłe pogawędki, gdy jestem w okolicy; serdeczne pozdrowienia także dla rodziców. Elu z Grzesiem i Pawelkiem, dziękuję Wam za tę wieloletnią przyjaźń. Agnieszko z Sebastianem i Mateuszkiem, nawet nie wiecie jak wiele radości sprawia mi kiedy mogę się do Was wprosić i z Wami poplotkować.

I am very grateful to Jenny, Rainer and Gienia for visiting me and bringing lots of sweets ;) as well as for sojourn and delicious meals on my way to Poland.

Marlenko, dziękuję Ci za odwiedzin I czekam na kolejną okazję! Sebastian (i Patrycja), jak mnie nie odwiedzicie to się chyba pogniewam... a podstawki pod głośniki są super!

At the end I thank my family for their support for my ideas and plans: my parents: Bogusia I Marian, my brother Przemek (with Edytka). Bez waszego wsparcia na pewno nie udałoby mi się osiągnąć tego wszystkiego.

Thank you all!
