Acknowledgements

Luc, thank you for enthusiastically leading me through my whole Ph.D. pursuit, encouraging me to be an independent researcher from the first day I started, and generously sharing your scientific and professional experience. I greatly appreciate your immense investment of time and efforts, ideas and thinking to make my doctoral journey productive and stimulating. You always stood beside me, making available your support, which made me feel secure and confident. I would also like to thank you for having a lot of care and understanding for my private life.

Paul, it is my honor to have you as my supervisor. Thank you for being a knowledgeable and flexible advisor to let me work in the clinic as well, and always being ready to help.

Michel, thank you for your insightful questions and inspiring comments on those manuscripts at the last minute. It would not have been so easy for the acceptance of these articles to be published without your advice and guidance.

Dongmei, my advisor in microbiology, thank you for taking care of me during my 'lab times'. Thank you for introducing me who started as an absolute beginner to the wonderland of microbiology and always being available whenever I need your help.

Bram, my closest work partner, special thanks to you for your tremendous contribution of time and excellent work. I would definitely have not been able to finish all these work without you.

In regards to microbiology studies, I especially would like to thank Michel Hoogenkamp, Rob Exterkate and Marc Buijs for teaching me with your patience, instructions and remarks. I also want to thank Saskia for her hard work in order to establish a biofilm model for irrigation testings.

Professor Xuejun Gao, thank you for introducing me to ACTA when I was finishing my master program in Beijing, for being my committee member and for coming all the way here to my oral defense.

For this thesis I would like to thank other committee members: Matthias Zehnder, Wim Crielaard, Cor van Loveren and Albert Feilzer for your time, interest, and helpful comments.

Special appreciate should be given to all my Chinese friends in ACTA or once in ACTA, and especially to Min-Kai for sharing your outstanding scientific experience, your advice and support on my work and private life.

Christos, Ricardo, Suzette and all other doctoral students in CEP group, getting to know you are truly one of the greatest luck in my life. You are so different from, but also so much alike, each other: funny, loving, smart, generous, and sensible! Thank you for the passionate friendship, numerous enthusiastic discussions about science, career, and more importantly, life.

Mom and Dad, thank you for your love and being always backing me up; Peng, my husband and best friend, thank you for having given up so much and starting all over again with me here in the Netherlands, thank you for every single day we have spent; Ruoxi, my sweet heart, thank you for allowing me to recognize the world once more and appreciate what I have.

Lastly, I would like to show my sincere gratitude to all of those who have supported me in any respect during the completion of the thesis.
