ACKNOWLEDGMENTS

During this PhD there were many people who helped me along the way, so now comes the opportunity to thank everyone who was directly or indirectly involved in the completion of this thesis.

First of all my promotor and co-promotor who guided me and gave me the opportunity to produce this thesis. Paul-Peter, thank you for your guidance and for always reminding me to think in terms of chapters/manuscripts. Thanks for the friendly words during our work discussions, especially during the down moments of my PhD. I really admire that although always so busy and traveling around the world you would still make time to correct my manuscripts on short notice. Kris, thanks for your guidance and supervision. Although our personalities did not always match, you helped me develop my scientific spirit and shared your knowledge with me. Thanks for always making time to answer my questions and of course, for the help in 'pimping' my manuscripts!

Then, my team without whom this thesis would not have been possible. My special thanks to Marjolein Sanders who through all these years has become the indispensable piece in our team. Thanks for all the help whenever an extra pair of hands was necessary, I enjoyed working with you! Daphne, Sarah, Alek and Wendy, thanks for all the extra hours spent in the ARIA with the mouse experiments! I really appreciate your help during this thesis, I could not have made it without you! Thanks also to the 'ex-team' Dion and Tânia. It was a pleasure working with you all!

My two good friends and paranimfen, Gabriela and Tineke, thanks for accepting this job! I enjoyed the moments spent together at work, but especially the nice moments outside work! Thanks for the nice dinners and 'uitjes' - we should enjoy them more often!

Then all the roomies I had during these years: Klaas (thanks for all the advices with the mouse experiments!), Alex (thanks for cheering up the office with your singing :)), Amber, Marianne, Bernard, Lena (спаси́бо за Вашу дру́жбу!), Mourad, Sander, Pol and Natasha. Thanks for making the work environment fun and 'gezellig'!

The Portuguese community: Cristina, Nuno e Inês. Cristina, obrigada por seres a minha conselheira durante o doutoramento. Obrigada pelas dicas, conselhos e pela amizade! Nuno, obrigada pelos bons momentos e pela amizade. Boa sorte em Portugal!

Acknowledgments

Felix and Paul K, I really enjoyed our dinners and going out, hope we'll have many more to come! Ronald, working with you made the weekend and 23.00h mouse experiments a bit more fun (although it may seem hard to believe!). Good luck with your promotion!

Martijn, your passion and enthusiasm for science are contagious. Thanks for all your nice suggestions and input in this thesis.

René van Lier and Eric, thanks for the critical reading of my manuscripts and for all the helpful suggestions during our work discussions. René, thanks for accepting to take part in the committee for my thesis defense.

Tom Smeets and Margriet, thanks for all the help with analyzing and interpreting my infinite immunohistochemistry slides.

I could not forget to thank the whole KIR team, including all doctors (who were always on alert for the precious synovial fluid samples), all the technicians and PhDs, and everyone at EXIM (including G1). Thanks for all the tips, help and specially for the nice environment to work in!

My thanks to our collaborators from Sanquin (Peter, Paula, Jean-Paul and Anne) for the nice discussions and help in making chapter 6 possible. My special thanks to Peter Hordijk for accepting to take part in the committee for my thesis defense.

João Eurico, muito obrigada pela hospitalidade em Lisboa!

I had the privilege to join a very nice team at the LUMC. Bart, Gaby, Sandra, Arno, Fleur, Menno, Tanja, Yvonne, Kay, Martijn, Arnaud, Stefan and Bobby, thanks for making me feel at home. Bart, your enthusiasm for science is really motivating! Thanks for the opportunity you're giving me to develop as a scientist.

How boring would life be without friends?... During my stay in The Netherlands I was fortunate to become friends with a special group of people, Fra, Edo, Dani, Ali, Agnieszka, Bert, Massi, Bas, Femke, Michiel, Volker, Imke, Vivianda, Ron, Jantienne, Clemens, thanks for all the great dinners, party's and for your friendship! Santa, Tai, Cristiana, Hugo e Hugo André, quem diria que depois do estágio ficariamos por cá para o doutoramento? Obrigada pelo vosso apoio, amizade e claro, pelos jantares portugueses!

Os meus amigos em Portugal... que saudades dos meus amigos portugueses... Catarina, Ana Catarina, Luísa, Tiago, Lu, Ana e Póvoas, vocês sabem que são os meus amigos de sempre, muito especiais! Apesar de passar tanto tempo sem nos vermos, quando nos re-encontramos a intimidade está sempre presente e parece que foi ontem, a última vez que estivemos juntos. Catarina e Luísa, espero que me perdoem pelas festas perdidas!

Obrigada a toda a minha família (tios, tias, primos e primas) e quase família (Zé e Alice), pelo carinho e amizade. António e Nuno, obrigada pela vossa amizade e por fazerem a minha mãe e irmã felizes!

Ik wil mijn nederlandse familie, Hans, Marianne, Marieke en Joost, bedanken omdat jullie mij het gevoel geven dat ik deel van jullie familie uitmaak. Naast een geweldige schoonfamilie zijn jullie ook goede vrienden!

Oma Mous, sinds de eerste keer dat ik jou ontmoet heb, voelt het alsof ik jouw kleinkind ben. Dank je wel voor jouw liefde. Ik wil ook de hele familie Mous & Distelbrink bedanken voor alle warmte die jullie mij geven.

E agora as pessoas mais especiais, que mais me apoiaram durante este projecto...

Mãe, obrigada pelo teu carinho, apoio e compreensão. Obrigada por, apesar de ser difícil ver-me partir para longe, sempre me teres apoiado e dado força durante este projecto. Sabes que apesar de estar longe, tu estás sempre no meu coração! Lila, minha manita, sabes que sem o teu incentivo talvez nem teria começado este projecto. Obrigada por sempre me fazeres acreditar em mim, especialmente nos momentos mais difíceis. Vocês sabem que eu tenho muito orgulho de vos ter como mãe e irmã e que vos adoro! Muito obrigada por tudo!

Finally I would like to thank this PhD for giving me the opportunity to meet Rogier... Lieve Rogier, bedankt voor jouw liefde en vriendschap, dat je altijd in mij bent blijven geloven en mij gesteund hebt tijdens de moeilijke momenten. Ik ben heel gelukkig om iemand zo speciaal te hebben naast mij. Eu amo-te muito muito!

Joana
