Contents

| Chapter 1 | General introduction | 5 |
|------------------|--|-----|
| Chapter 2 | Linking microbial community function to phylogeny of sulfate-reducing <i>Deltaproteobacteria</i> in marine sediments by combining stable isotope probing with magnetic bead capture hybridization of 16S rRNA | 13 |
| Chapter 3 | Linking microbial community structure and function in marine intertidal sediment by Mag-SIP | 33 |
| Chapter 4 | Characterization of anaerobic bacterial chemoautotrophy in intertidal marine sediments | 51 |
| Chapter 5 | Tracing carbon flow from microphytobenthos to major phylogenetic groups in the bacterial community in an intertidal marine sediment | 67 |
| Chapter 6 | General discussion | 89 |
| Summary | | 95 |
| Samenvatting | | 99 |
| 要 約 | | 103 |
| References | | 107 |
| Acknowledgements | | 119 |
